

Prof. Konrad E. Bloch, MD
Zurich, 28.2.2018

Prof. Bloch is Professor of Respiratory Medicine at the University of Zurich and Deputy Director of the Clinic of Pneumology, University Hospital Zurich. His clinical activities as a pulmonary physician include general respiratory medicine including respiratory sleep medicine and noninvasive ventilation. His current research is focused on investigation of physiologic and clinical effects of altitude exposure on healthy individuals and on patients with respiratory disease such as chronic obstructive pulmonary disease, sleep apnea and pulmonary hypertension.
